This Financial Assurance is just for the OU1 remedy and maintenance of the remedy, and will be totally separate from FAI that you guys hold on the active portion of the landfill.

Dan

I am sending you the groundwater records provided by Allied Waste for the Bridgeton Landfill. These records are for the West Lake Radionuclide Remediation Project.

Scott Waltrip has information on costs for the closure and post-closure care of sanitary landfills in draft form. If long term maintenance of the West Lake site is a key component for protection of people around that site, the costs for post-closure care may be of value your record.

Will the financial assurance instrument for the existing landfill be voided with the financial assurance instrument fro your project or will you be able to exclude the closure of the existing landfill from your financial instrument and record of decision?

The standards shown in the quality.mdb database are drinking water standards. The Solid Waste Management Program is reviewing other appropriate standards to include in that database.

Dan, I could not get the access database to go through the email system. It was too large, but I hope this excel sheet serves to provide a continuing history of groundwater around the active landfill.

Frank Dolan
